

# **ISPS Code Overview**

**International Ship & Port  
Facility Security Code**

# ISPS Code Objectives

## Objectives:

- To provide an international framework to detect security threats and take preventive measures against security incidents
- To **detect** and **deter** acts that threaten security
- Ship and port facility cooperation

# ISPS - Key Definitions

## Ports & Port Facilities & RSO's

- **Port** - the area through which ship traffic and maritime commerce flow or people are transported, including areas ashore (extending to intermodal and cargo storage areas) and on the adjacent waters (to include anchorage & approaches), as defined by the designated authority.
- **Port Facility** - is a location where the ship/port interface takes place, including anchorage, berths and approaches.
- **Recognized Security Organization (RSO)** - an organization with appropriate expertise in security and anti-terrorism matters recognized by the Administration [or designated authority] and authorized by it to carry out assessment, verification, approval and certification activities, on its behalf.
